This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at `http://books.google.com/`

TABLES

SHEWING THE COMPARATIVE VALUE

OF THE

FRENCH AUNE ~~WITH~~ ENGLISH YARD,

FROM THE

Centimes per Aune producing a Farthing per Yard to Sixteen Francs per Aune, and from the Exchange of 21 *to* 26 *Francs,*

CALCULATED ON THE MEASURES OF

PARIS, LYONS, ROUEN AND NANTES;

TO WHICH ARE ADDED,

Tables on the Exchanges

OF ENGLISH WITH FRENCH MONEY FROM 21 TO 26 FRANCS, AND TABLES SHEWING THE DUTY OF £30 PER CENT. ADDED TO ANY SUM FROM ONE FARTHING TO £10,000,

AND THE NET AMOUNT OF SUCH PER CENTAGE.

ALSO A CONCISE

READY RECKONER IN FRANCS AND CENTIMES.

BY EDWARD JENKIN.

London:

TO BE HAD OF THE AUTHOR, 136, CHEAPSIDE,
AND SOLD BY EFFINGHAM WILSON,
ROYAL EXCHANGE.

1826.

510.

BIBLIOTHECA BODLEIANA

Entered at Stationers'-Hall.

PRINTED BY R. G. GUNNELL AND CO.
SALISBURY SQUARE, FLEET-STREET.

PREFACE.

In those public acts of the Legislature, where the laws are made for the general good, however strongly the theory of them may be expressed, or well supported by arguments, yet, if not fully appreciated, and clearly understood, by the persons for whose interest they provide, they are rendered extremely difficult of execution by the *indirect* opposition, arising from the want of facility in their operation, and the effect is thereby greatly retarded in dispensing the intended good.

With this view, the author of the following Tables hopes to assist the commercial intercourse which has been opened between England and France, and to cultivate the principle of a free trade, which cannot fail ultimately, to add to the welfare and prosperity of this country.

In this opinion the author feels flattered by the number of highly respectable names in the list of subscribers to this work; and he considers it his duty here to return his most grateful acknowledgments for the very liberal patronage with which it has been honoured; and it is his sincere wish, that the assistance it may afford to his countrymen trading with France, may tend to give them that confidence, which will enable them to traffic to the best advantage, and to guard them against those inconveniences which would unavoidably arise on trading with a foreign country.

In making comparisons where no definite equality exists, much difficulty arises in assimilating the unlike proportions; to gain the approximity to which, the author has bestowed much attention; but, should he in some instances have erred, he begs to plead, that the subject has been conducted without an example for his guidance, and it is only by closely investigating the circumstances immediately connected with it, and well digesting the plan, that he has been enabled to produce the work in its present form.

He, however, hopes that while, on the one hand, he avoids angling for praise, he appeals to a liberal public when he deprecates their censure.

Although these calculations more particularly apply to the importation of Silk Goods, a Treaty having been made expressly for their admission, yet they are equally applicable to all manufactures measured in a similar way.

On the Exchange of money between England and France, the author trusts that the Tables will meet every needed variety of transaction.—They apply to the general remittance of money to France; and shew the price of articles bought in corresponding quantities in the two countries, and subject only to the exchange between them.

To the above is added a comprehensive Ready Reckoner in francs and centimes, which he hopes will complete every required extent of consecutive calculation.

A duty of £30 per cent. *ad valorem*, being imposed on the importation of manufactured Broad Silks, and considering that Tables showing such duty would have a useful tendency, they are added to the work, being an excess of the originally intended plan.

LONDON,
136, *Cheapside*,
July, 1826.

EXPLANATION OF THE WORK.

As all manufactured goods in France are measured by their Aune, or Ell, the following differences arise when the value of the Ell is compared with the English Yard, viz.:—Between the length of the Yard and the Aune, and the length of the Aune differing at various places, the nominal difference of the English and French money, and the relative value of money, being subject to the exchange between the two countries.

The length of the Aune must be considered, *generally*, as measuring 47¼ English inches, as established by the decree of Napoleon in 1812, entitled, "*Le Code de Commerce*," which enforced the adoption of the measure therein named. There are, however, some towns in France which still measure by the old Aune, of which every principal town formerly, had its peculiar length. These must be considered now *only* as retained.

In calculating the lengths of the Aune, that of the Parisian, of 47¼ English inches, has been used as the standard of the country; that of Lyons, or 46⅛ English inches; that of Rouen, or 45⅛ English inches; and that of Nantes, or 55⅛ English inches, the fluctuation of the Exchange being assimilated to the Tables, and made applicable to all places, where any of the said lengths may be used. The plan will be further exemplified by referring to page 62, when, to buy an Ell by the Parisian measure at the exchange of 22*f.* 16*c.*, and 6*f.* 51*c.* be given for the Ell, the sum meeting in the square of the francs and centimes (viz. 4*s.* 5¾*d.*) is the price per Yard.

The Tables extend from the centimes per Aune, which produce a farthing per Yard, to 16 francs per Aune, and advance by all intermediate farthings from *one* farthing to ten shillings and eleven pence farthing per Yard.

The prices of the yard, mostly, carry remainders; and considering it probable that they would have no practical utility, and perhaps confuse, where perspicuity is the greatest object to attain, the author has expunged the *general* introduction of them in the work, reserving them only to the yard of the integral francs per Aune, and where they assume the appearance of an eighth of a penny. The price, at equal distances between two-eighths, is only where it may be considered as having no remainder:—for example: On page 32, all the prices per Aune have remainders.—The price 3*f.* 3*c.* per Aune, produces 2*s.* $1\frac{3}{4}$*d.* per Yard and a remainder, which is accumulated to the eighth of a penny at 48 cents, as 2*s.* $5\frac{1}{2}+\frac{1}{8}$*d.* The next price 3*f.* 51*c.* being nearer the advance of a *half-penny*, than that of a farthing, the deficiency is supplied, and appears as 2*s.* 6*d.* From the first price to 48 cents, the *remainder* increases; from 51 cents to the integral francs, the deficiency diminishes. In page 92 the result is precisely reversed.

The Exchanges embrace the fluctuations between 21 and 26 francs: at each extreme, any Tables subject to a commercial treaty would be rendered nugatory by the state of political interest.—The simplicity of the plan needs no comment.

Of the Ready Reckoner, a single example will sufficiently explain its use. If 46 Ells be purchased at 4*f.* 65*c.* per Ell, the total amount will be found as under:—

	f.	*c.*
46 Ells at 4*f.* 0*c.*.....	184	0
46 Ells at 0*f.* 65*c.*.....	29	90
Amount required	213	90

The first Table of duty shews the amount of £30 per cent. added to the principal; as, for example:—If 4*s.* 10*d.* be the amount required, by referring to that sum in the Table, the sum immediately opposite in the next column (6*s.* 3¼*d.*) is the amount with such addition.

On the same plan, the succeeding Table shews the *net* amount of such per centage.

N. B.—The nearest approach to all farthings, is carried *through* the work; and in case of a remainder, when accumulated to an eighth, is *added*, or diminished in that of a deficiency.

All remainders on the Yard of the integral francs per Aune, are parts of a *farthing*; and all eighths are parts of a *penny*.

A

COMPARATIVE VALUE

OF THE

FRENCH AUNE

WITH THE

ENGLISH YARD.
